NANOTECH HACKATHON

Innovative solutions for "*Grand Challenges for India*" through nanotechnology...

The Nanotech Hackathon is a nationwide contest for students/academic researchers to come up with a nanotechnology-based solutions for the grand challenges that India is facing as a developing country. These grand challenges are mainly in the areas of Agriculture, Health Care, Energy, Environment, Security, Smart Cities, Defence etc.

Applications are invited!

☑ **Submit your ideas on nanotechnology based devices targeting cost-effective products and services for societal needs**

☑ **This Hackathon's focus is on**

Energy & Environment

Healthcare Devices & Technologies

Facilities
Details of facilities available at the centre can be found at the URL below
https://mems.iitm.ac.in/cnnp/capabilities/

Eligibility
- Minimum 18 years as on the date of applying : No upper age limit.
- Proposal submission can be done by a single participant or a group having maximum 4 members.

** Guide approval is mandatory to submit the hackathon proposal

Support from INUP, IIT Madras
- Infrastructural & Technical Support
- Technical Mentoring
- Free of cost Fabrication & Characterization
- Connection with the facilities for packaging
- Connection with the start-up Incubators
